

Konektivita při oddball úkolu

Petra Haitová

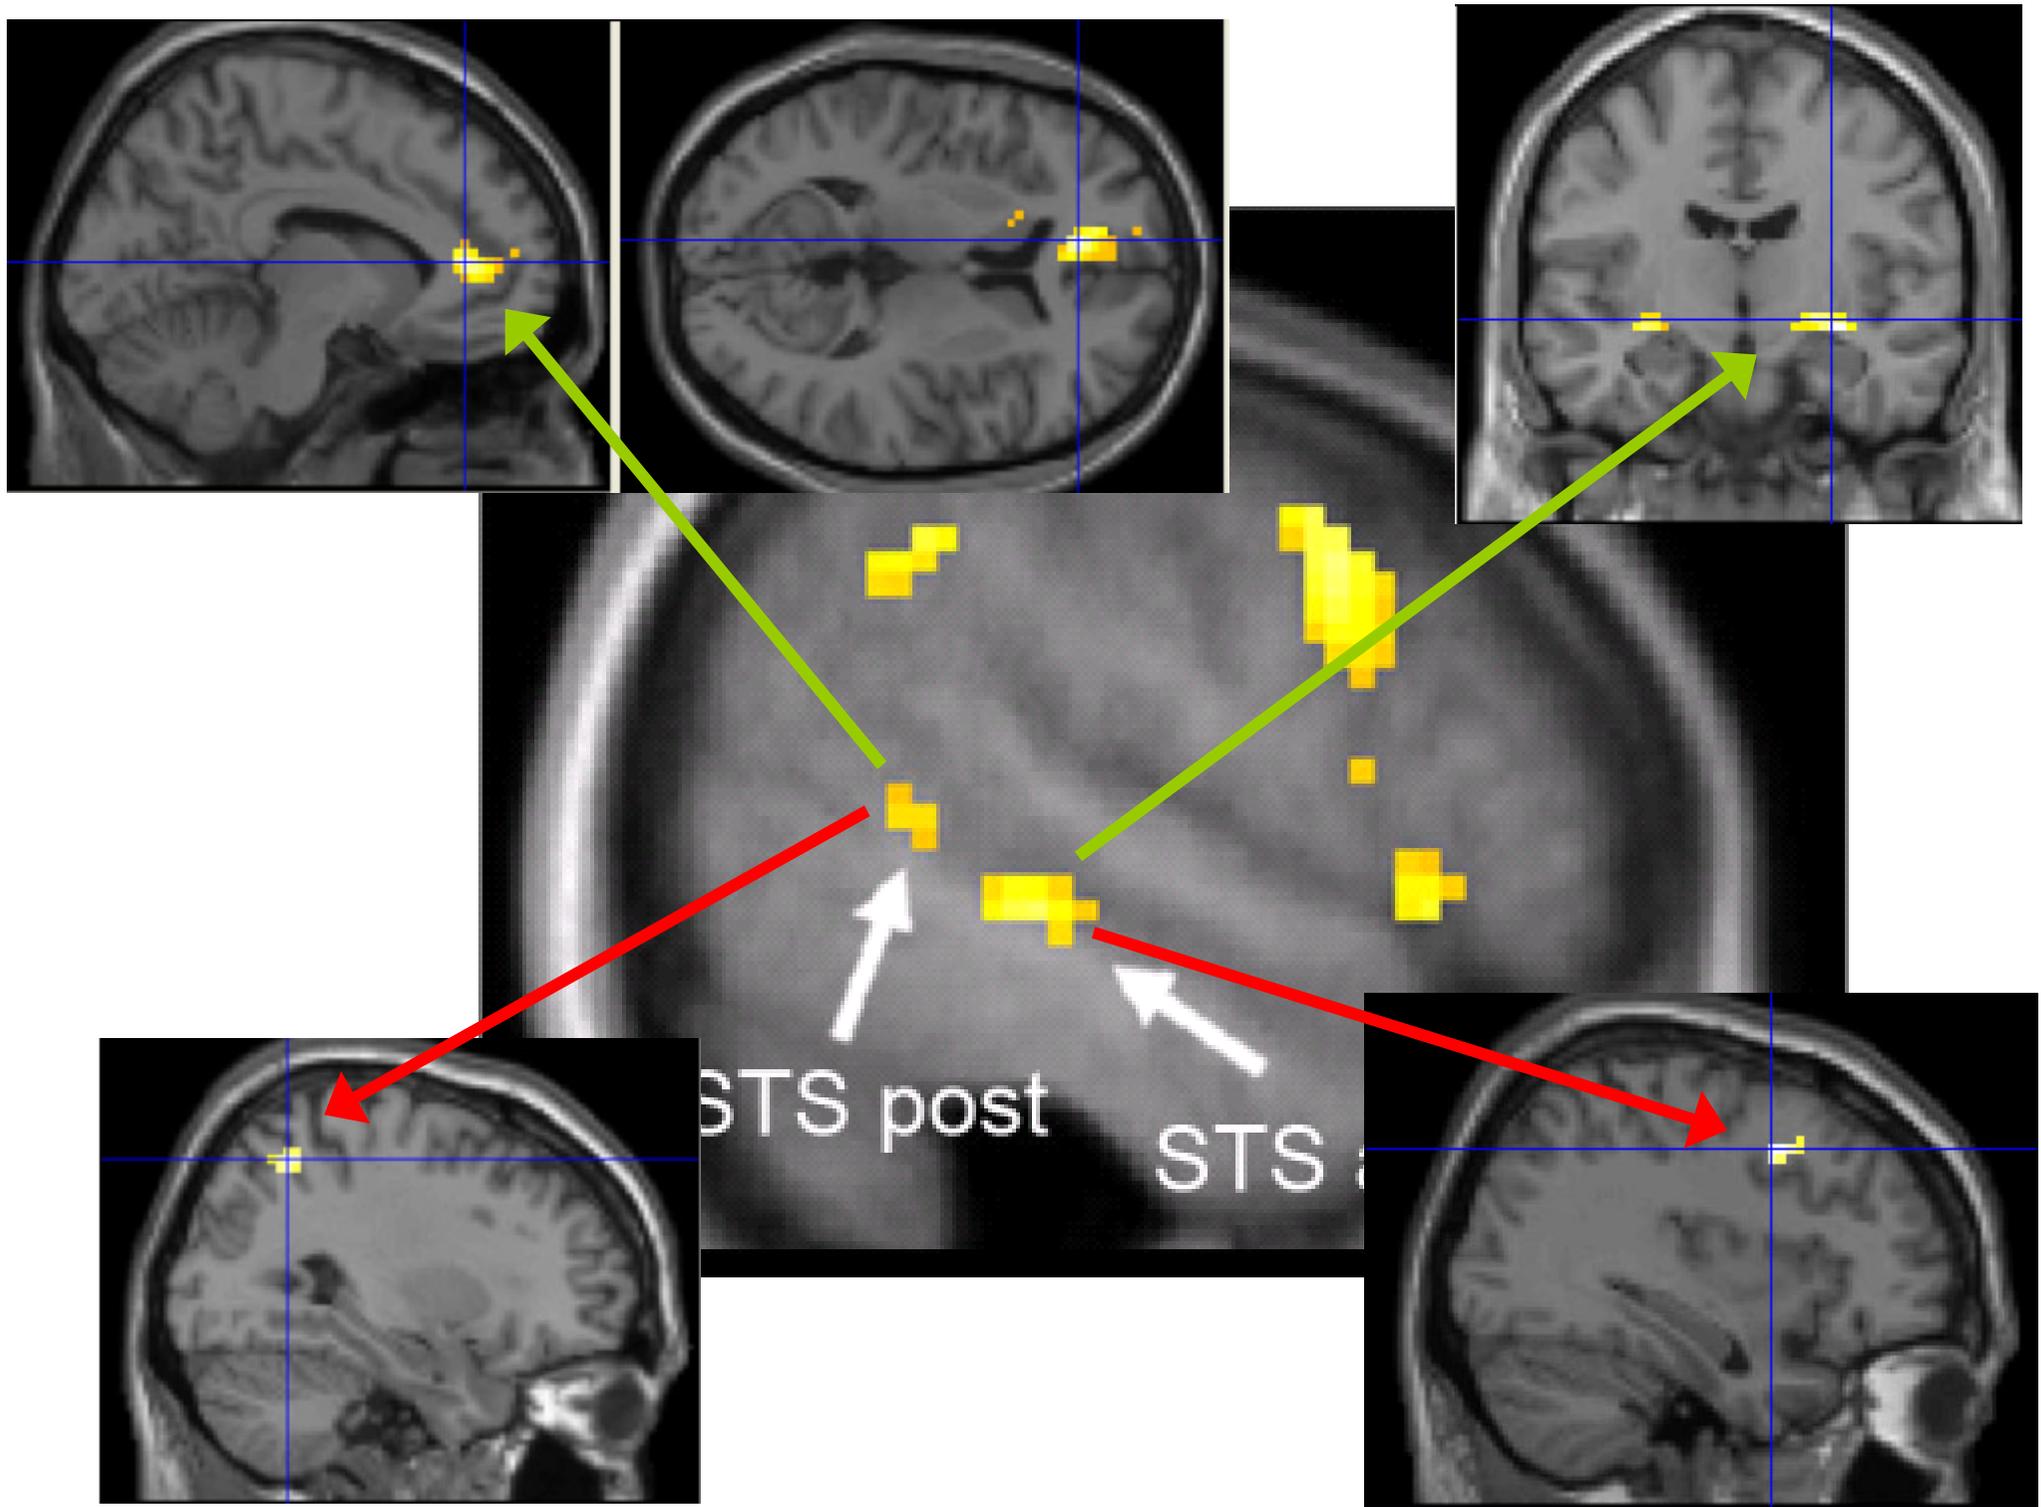

Oddball úkol

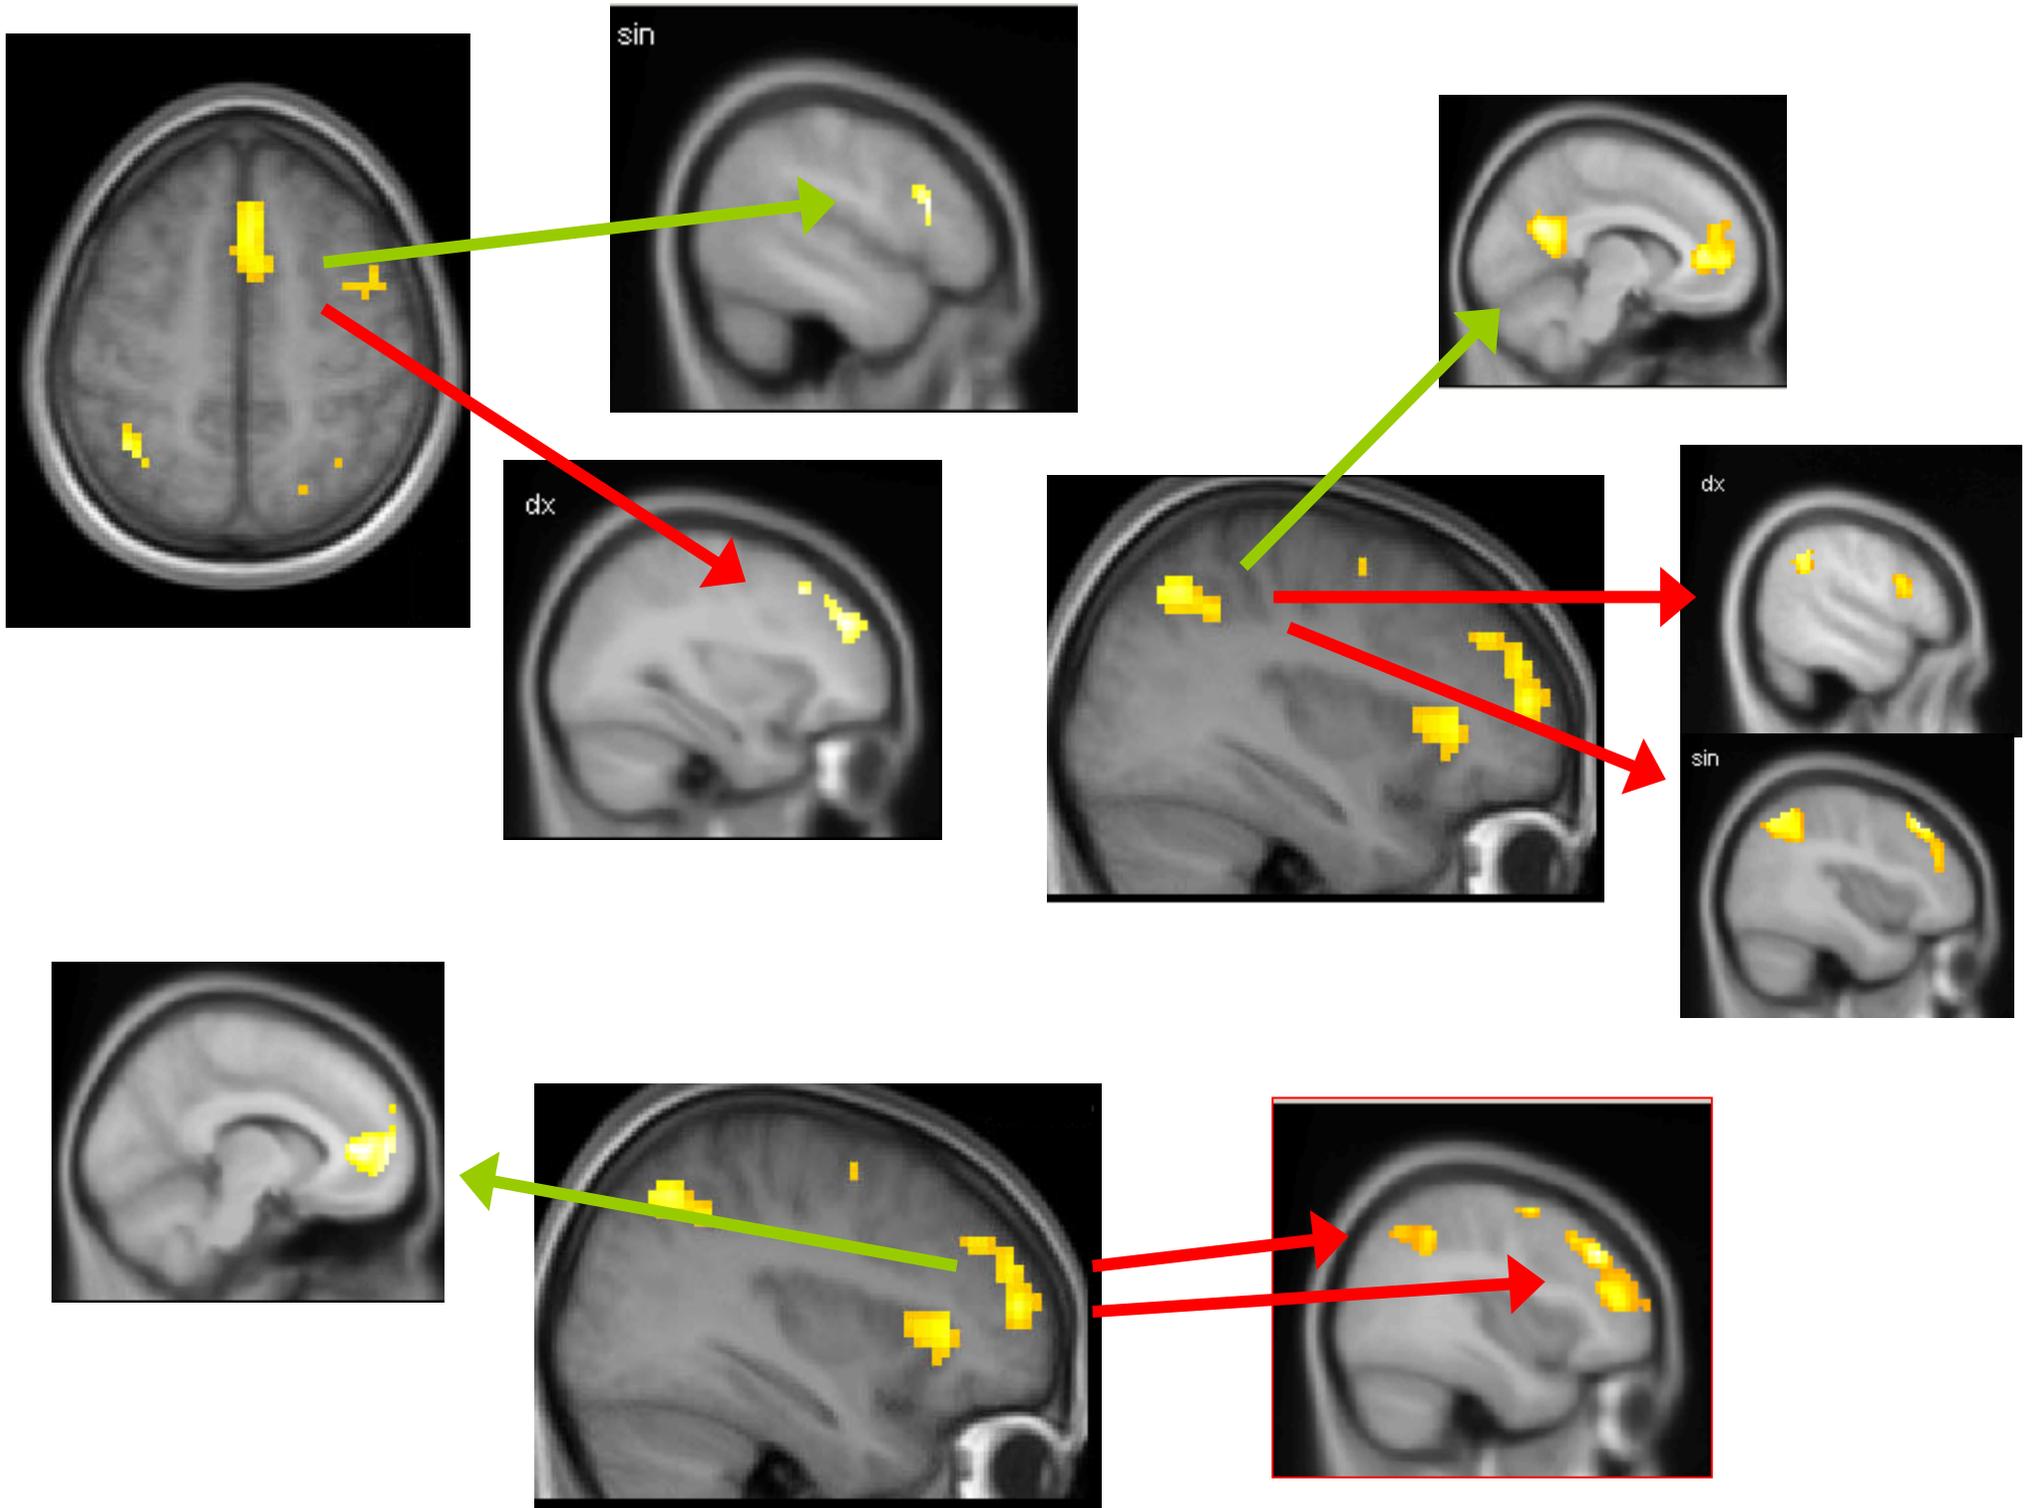

- fMRI, 20 zdravých dobrovolníků
- vizuální oddball úkol
- frequent : **target**

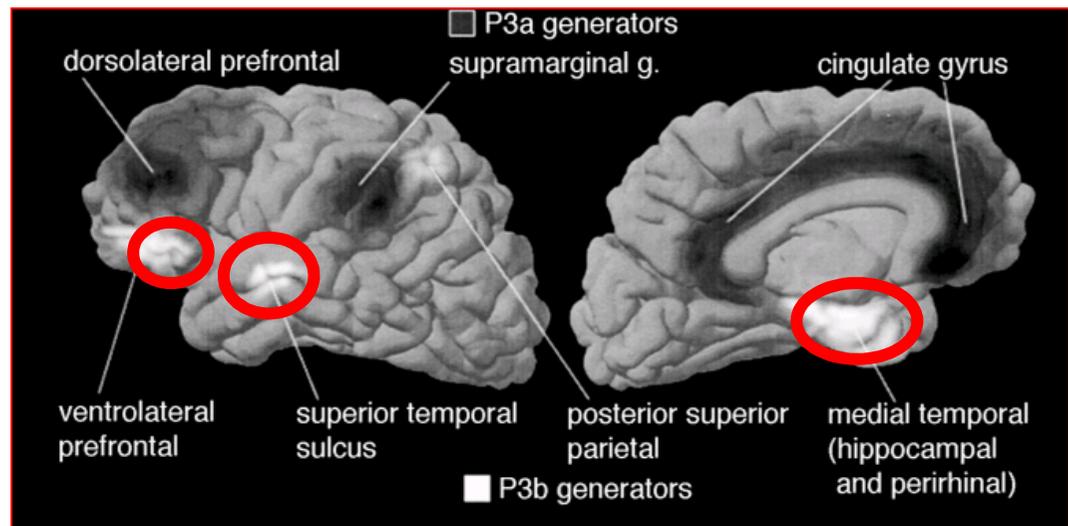

Default mode network

- Precuneus
- Mediální prefrontální kortex
- Zadní cingulum
- Laterální parietální kortex
- Interní stimuly, „mind-wandering“, kreativita
- Alzheimerova choroba, autismus, schizofrenie

- **STS, VLPFC, hippocampus** – P3b
(pracovní paměť, kategorizace...) (Halgren et al., 1998)

Záleží na konektivité?

Harry Beck, plán
londýnského metra,
